What do you know about Gutenberg?

About Gutenberg

Johannes Gensfleisch zur Laden zum Gutenberg

The current WordPress content editing experience

It's not that good to be honest

- WYSIWYG?
- Widgets
- Shortcodes
- Media
- Embeds
- Meta boxes

The screenshot shows the WordPress 'Nieuw bericht toevoegen' (Add New Post) interface. At the top, there's a title field with the placeholder 'Titel hier invoeren'. Below the title field is a toolbar with icons for media, form, and text, along with a 'Visueel' (Visual) tab. The main content area is a large text editor with a vertical cursor. To the right of the text editor is a sidebar with several sections: 'Publiceren' (Publish) with buttons for 'Concept opslaan' (Save Draft) and 'Voorbeeld' (Preview), a status dropdown set to 'Concept', and a 'Publiceren' button; 'Berichttype' (Post Type) with radio buttons for 'Standaard' (Standard), 'Aside', 'Afbeelding' (Image), 'Video', 'Citaat' (Quote), 'Link', 'Galerij' (Gallery), and 'Audio'; 'Categorieën' (Categories) with a 'Meest gebruikt' (Most Used) tab and a list of categories (cat1, cat2, cat3, Geen categorie); 'Tags' with a 'Toevoegen' (Add) button and a list of tags; and 'Uitgelichte afbeelding' (Featured Image). At the bottom of the sidebar, there's a section for 'Reacties' (Comments) with checkboxes for 'Reacties toestaan' (Allow Comments) and 'Trackbacks en pingbacks toestaan op deze pagina' (Allow Trackbacks and Pingbacks on this page).

When is it ready?

The screenshot shows the GitHub repository for WordPress Gutenberg. At the top, it says "WordPress / gutenberg" with 207 watches, 2,022 stars, and 458 forks. Below this, there are tabs for Code, Issues (606), Pull requests (180), Projects (12), Wiki, and Insights. The main description reads: "Printing since 1440. Development hub for the editor focus in core. Beta plugin is available from the official WordPress repository. <https://wordpress.org/plugins/gutenbe...>". There are three tags: wordpress, gutenberg, and wordpress-plugin. A progress bar shows 5,309 commits, 206 branches, 30 releases, and 161 contributors. At the bottom, there are buttons for "Branch: master", "New pull request", "Create new file", "Upload files", "Find file", and "Clone or download".

Adding a post - New editor

The screenshot displays the WordPress 'Add New Post' editor. The main content area on the left features a large text input field with the placeholder 'Add title' and a smaller text input field with the placeholder 'Write your story'. The right-hand sidebar contains several settings panels. The 'Status & Visibility' panel includes options for 'Visibility' (set to 'Public'), 'Publish' (set to '27 februari 2018 12:06'), 'Post Format' (set to 'Standard'), 'Stick to the Front Page' (toggle off), and 'Pending Review' (toggle off). The 'Categories & Tags' panel shows a list of categories with checkboxes: 'Geen categorie', 'cat1', 'cat2', and 'cat3', along with a link to 'Nieuwe categorie toevoegen'. Below this is a 'Tags' section with a text input field labeled 'Nieuwe tag toevoegen'. The 'Uitgelichte afbeelding' panel includes a link to 'Uitgelichte afbeelding kiezen'. The 'Excerpt' panel has a text input field for 'Write an excerpt (optional)' and a link to 'Learn more about manual excerpts'. The 'Discussion' panel at the bottom includes toggle switches for 'Allow Comments' and 'Allow Pingbacks & Trackbacks', both of which are currently turned on.

WordPress 5.0

WordPress 5.0 Development Cycle

Goals (To be posted) | [Dev Chat Agendas](#) | [Dev Chat Summaries](#) | [Dev Notes](#) | Field Guide (To be posted) | [All Posts Tagged 5.0](#)

WordPress 5.0 will be the first “major” release of 2018, including the new editor, codenamed “Gutenberg”.

Release Schedule

November 15, 2017	Trunk is open for business. (Post-4.9)
TBD	5.0 Kickoff meeting.
TBD	Last chance to merge feature projects.
TBD	Beta 1 and feature project merge deadline.
From this point on, no more commits for any new enhancements or feature requests in this release cycle, only bug fixes and inline documentation . Work can continue on enhancements/feature requests not completed and committed by this point, and can be picked up for commit again at the start of WordPress 5.1.	
TBD	Beta 2.
TBD	Beta 3.
TBD	Beta 4.
TBD	Release candidate and soft string freeze .
TBD	Final release candidate if needed and hard string freeze .
TBD	Dry run for release of WordPress 5.0 and 24 hour code freeze.
TBD	Target date for release of WordPress 5.0.

What browsers will Gutenberg support?

Gutenberg will work in modern browsers, and Internet Explorer 11.

Whatever happens...

“no matter the
challenge, WordPress and the
community are built to survive”
