The background of the image is a dense, chaotic pile of wooden printing blocks. These blocks are in various shades of brown, tan, and grey, and feature different fonts and sizes of letters and numbers. They are scattered across the entire frame, creating a textured, historical feel.

Gutenwhat?

Wat weet jij van Gutenberg?

About Gutenberg

Johannes Gensfleisch zur Laden zum Gutenberg

De huidige manier van content bewerken in WordPress

Het is toch eigenlijk niet echt heel duidelijk...

- WYSIWYG?
- Widgets
- Shortcodes
- Media
- Embeds
- Meta boxes

The screenshot shows the WordPress 'Nieuw bericht toevoegen' (Add New Post) editor interface. The main content area is a large text editor with a toolbar at the top containing various formatting options like bold, italic, link, and list. Below the text editor is a 'Samenvatting' (Summary) section with a text input field and a note about manual summaries. The 'Trackbacks verzenden' (Send Trackbacks) section includes a text input for the URL and a note about trackbacks. The 'Reacties' (Comments) section has checkboxes for 'Reacties toestaan' (Allow comments) and 'Trackbacks en pingbacks toestaan op deze pagina' (Allow trackbacks and pingbacks on this page). On the right side, there are several meta boxes: 'Publiceren' (Publish) with buttons for 'Concept opslaan' (Save Draft) and 'Voorbeeld' (Preview), 'Berichttype' (Post Type) with radio buttons for 'Standaard' (Standard), 'Aside', 'Afbeelding' (Image), 'Video', 'Citaat' (Quote), 'Link', 'Galerij' (Gallery), and 'Audio', 'Categoriën' (Categories) with a list of categories and a 'Nieuwe categorie toevoegen' (Add New Category) link, 'Tags' with a text input and a 'Toevoegen' (Add) button, and 'Uitgelichte afbeelding' (Featured Image).

Wanneer is het klaar?

The screenshot shows the GitHub repository page for WordPress Gutenberg. At the top, it displays the repository name 'WordPress / gutenberg' and several action buttons: 'Watch' (249), 'Star' (2,565), and 'Fork' (645). Below this, there are navigation tabs for '<> Code', 'Issues 656', 'Pull requests 173', 'Projects 13', 'Wiki', and 'Insights'. The main content area contains the text: 'Printing since 1440. Development hub for the editor focus in core. Beta plugin is available from the official WordPress repository. <https://wordpress.org/plugins/gutenbe...>'. Below the text are three tags: 'wordpress', 'gutenberg', and 'wordpress-plugin'. At the bottom, there is a summary bar with the following statistics: '6,433 commits', '199 branches', '39 releases', and '214 contributors'.

WordPress / gutenberg

Printing since 1440. Development hub for the editor focus in core. Beta plugin is available from the official WordPress repository. <https://wordpress.org/plugins/gutenbe...>

wordpress gutenberg wordpress-plugin

6,433 commits 199 branches 39 releases 214 contributors

Starten met Gutenberg

Stap 1: Download en activeer de plugin

The screenshot shows the WordPress 'Plugins toevoegen' (Add Plugins) page. The left sidebar contains navigation options: Dashboard, Berichten, Media, Formulieren, Pagina's, Reacties, Weergave, **Plugins** (highlighted), Geïnstalleerde plugins, Nieuwe plugin, Plugin Editor, Gebruikers, Hulpmiddelen, Instellingen, Extra velden, and Menu invoegen. The main content area is titled 'Plugins toevoegen' and includes a search bar with 'Trefwoord' and 'Plugins zoeken...'. Below the search bar, there are tabs for 'Beta testen', 'Uitgelicht', 'Populairste', 'Aanbevolen', and 'Favorieten'. A notice states: 'Je maakt gebruik van een ontwikkelversie van WordPress. Deze feature plugins zijn ook in ontwikkeling. [Meer leren.](#)'

The 'Uitgelicht' (Featured) section displays four plugins:

- Gutenberg**: 'We werken aan een nieuwe bewerkingsscherm voor WordPress, met als doel het gemakkelijker dan ooit...'. It has 491 ratings (4 stars), 10.000+ active installations, and was last updated 1 week ago. A red arrow points to the 'Activeren' button.
- Dark Mode**: 'Lets your users make the WordPress admin dashboard darker.' by Daniel James. It has 22 ratings (5 stars), 700+ active installations, and was last updated 2 weeks ago.
- Two-Factor**: 'Enable Two-Factor Authentication using time-based one-time passwords (OTP, Google Authenticator), Universal 2nd Factor (FIDO U2F,...' by George Stephanis. It has 48 ratings (5 stars), 3.000+ active installations, and was last updated 3 months ago.
- Application Passwords**: 'A feature plugin for core to provide Application Passwords' by George Stephanis. It has 15 ratings (5 stars), 4.000+ active installations, and was last updated 6 months ago.

Een bericht toevoegen - Met de nieuwe editor

The screenshot shows a content management system editor. The main editing area is white and contains the text "Voeg titel toe" in a large, bold font, followed by "Schrijf je verhaal" in a smaller font. To the right of the text are icons for inserting an image, bold text (H), and a link. The top of the editor has a toolbar with icons for undo, redo, and help. On the right side, there is a sidebar with a "Document" tab selected. The sidebar contains the following sections:

- Status & zichtbaarheid** (expanded):
 - Zichtbaarheid: [Openbaar](#)
 - Publiceer: [30 mei 2018 13:50](#)
 - Maak vast aan de voorpagina:
 - Wachten op beoordeling:
- Categorieën** (dropdown)
- Tags** (dropdown)
- Uitgelichte afbeelding** (dropdown)
- Samenvatting** (dropdown)
- Discussie** (dropdown)

Demo tijd!

WordPress 5.0

WordPress 5.0 Development Cycle

Goals (To be posted) | [Dev Chat Agendas](#) | [Dev Chat Summaries](#) | [Dev Notes](#) | Field Guide (To be posted) | [All Posts Tagged 5.0](#)

WordPress 5.0 will be the first “major” release of 2018, including the new editor, codenamed “Gutenberg”.

Release Schedule

November 15, 2017	Trunk is open for business. (Post-4.9)
TBD	5.0 Kickoff meeting.
TBD	Last chance to merge feature projects.
TBD	Beta 1 and feature project merge deadline.
From this point on, no more commits for any new enhancements or feature requests in this release cycle, only bug fixes and inline documentation . Work can continue on enhancements/feature requests not completed and committed by this point, and can be picked up for commit again at the start of WordPress 5.1.	
TBD	Beta 2 .
TBD	Beta 3 .
TBD	Beta 4 .
TBD	Release candidate and soft string freeze .
TBD	Final release candidate if needed and hard string freeze .
TBD	Dry run for release of WordPress 5.0 and 24 hour code freeze.
TBD	Target date for release of WordPress 5.0.
